Auto Mute With Full Keygen [Win/Mac] [Updated-2022]

What is new in official Auto Mute 5.4 software version? - Update description Major update for Auto Mute by RegiSoft - Auto Mute 5.4 Now running with.NET 2.0 and.NET 3.5 SP1 New: Auto Mute now runs on Windows 7 (32 bit) and 2008 (64 bit). What's new in official Auto Mute 5.4 software version? - Update question Original review: Auto Mute 5.0 A small utility developed specifically for performing the task of shutting down the PC sound automatically. Unlike other tools in this category that have advanced settings, this one remains extremely simple and straightforward. Installed After a fast and easy installation, you are welcomed by a straightforward user interface. It features a single large window with a grid of the main options. All configuration settings are embedded in a single window, making it really easy for you to tweak the dedicated options. Display the sound volumes What's more, after a quick look at its options, you can change the sound volumes displayed via the system tray area, so you can review them quickly. Shut down the sound at logoff You can select the setting for automatically shutting down the sound at logoff. Play a beep sound when the system is shutdown There's no specific attention paid to the Hotkeys feature. However, it seems it can be assigned by the Windows key and "1", "2", and "3" buttons on your keyboard. Also, it's worth being mentioned that the software supports all sound formats and also supports the WMA, MP3, and AIFF formats. Other configuration settings worth being mentioned allow you to mute the sound when the computer is locked, and turn off the sound if the PC is locked. This gives you the ability to make your computer completely silent. Tests have pointed out that Auto Mute performs a task quickly and without errors. It is light on system resources so you do not have to worry that it hampers the overall performance of the computer. Let's look at some of its other features: Clean installation process After a quick and easy installation process where you only need to follow the preset steps in order to complete the task, you are welcomed by a simple and straightforward user interface. You can modify the hotkeys for turning the sound on and off The software also 6a5afdab4c

What's New in the?

Make the PC silent when it's turning on or waking up Auto Mute offers you the possibility to mute the sound on logoff, sleep, and shutdown so next time you open your computer the sound is off. What's more, you are allowed to automatically run the application at Windows startup and show its icon in the system tray area. Tests have pointed out that Auto Mute carries out a task quickly and without errors. It remains light on system resources so you do not have to worry that it hampers the overall performance of the computer. Automatic startup Other important configuration settings enable you to mute the sound upon logoff, suspend, and shutdown, disable the sound if the PC is locked, and turn off the sound when the screensaver appears. In addition, you can reassign a hotkey which can be used to turn the sound on or off and play a beep notification when the sound is enabled. Wake up PC Make the PC silent when it's turning on or waking up Auto Mute offers you the possibility to mute the sound on logoff, sleep, and shutdown so next time you open your computer the sound is off. What's more, you are allowed to automatically run the application at Windows startup and show its icon in the system tray area. Tests have pointed out that Auto Mute carries out a task quickly and without errors. It remains light on system resources so you do not have to worry that it hampers the overall performance of the computer. Bundled with freeware On top of that, the software bundle comes with four absolutely free PC and Windows apps that can be used to turn off the sound at any time you like. What's more, these can be used without restrictions. The tools are only those you require to do the job. Note: The authors of Auto Mute stand behind this product. They have developed a software, and they are definitely sure it will meet your expectations. They have also spent a lot of time to make sure that everything is as easy to understand as it can be. Auto Mute is a small software application developed specifically for helping you automatically disable the sound when the computer is turned on or is waking up. It can be deployed on all Windows versions out there. Clean configuration panel After a fast and simple installation process where you only need to follow the preset steps
