DesktopTodo is a freeware software that allows you to create, edit, and manage your current and upcoming tasks without effort. This program comes with a huge number of customization options that allow you to change the interface easily. Customization settings allow you to choose one of the many built-in themes for your interface to make it fit your style. This program also has many options that allow you to setup your tasks including dates, tags, priorities, and so on. Another great feature that this program has is that it can create multiple task folders and sub-folders within them that you can use to better organize your tasks. For instance, a clock folder with all the tasks that are due in the next few hours can be used to work on them before a fixed time. On top of that, you can also create sub-tags to help you group tasks according to their sub-categories. Once your task is created, you can use the built-in calendar to either visualize or manage your tasks. For example, you can see the list of tasks for a particular day and set yourself a date to get started with them. Furthermore, you can do all of that without having to log into the application's interface each time and use a different window. You can also set the interface to automatically synchronize from your computer to your web account in Toodledo.com to get even more access to your task data.
