But i want to split the output and output to one text file like this 1/5 Page 2 So i need to split the output string for each line. Any solutions, please guys help me to achieve this. Thanks in advance.

A: Assuming your output is in a list called output: output = [ '1/5 Mysticthumbs.keygen.3.0.5.64bit.With.Serial 1/5. boyz II men - evolution 1/5.boyz II men - evolution boyz men - evolution ' ..... Page 2 ..... ] with open('outfile.txt', 'w') as file: for i, line in enumerate(output): print >> file, line[i/5] This will create a file outfile.txt with the correct characters after the first 5 characters in every line.

B is not supported on AVR 4.6.X (or even 3.6.X) \* [DLL] Load DLLs from a list of specified names \* [DLL] Unload (unloadable) DLLs from memory \* [DLL] Load DLLs with relative paths \* [DLL] Load DLLs from a path \* [DLL] Extract a specific function from a DLL \* [DLL] Suppress annoying DLL warning messages \* [DLL] Load DLLs from a list of specified names \* [DLL] Suppress annoying DLL warning messages \* [STACK] Save current registered stack used by task \* [STACK] Restore current stack (restore original stack) \* [STACK] Unload stack \* [STACK] Unload stack registered by the task \* [REG DLL] Load DLLs from a path
