How To Crack SkyDrift: Gladiator Multiplayer Pack:

Before You Install: Please read my Buy Boot: Game Dev Sim Tutorial. Next to understand how it all works.

You should always back up your save files. I figured I'd be smart and not just keep them on a second hard drive where they can be lost. Say bye bye to overwriting all your progress.

So to begin, you'll need to download the game. I used the Demo just for the sake of simplicity, but you can use the full game without issues. It is shareware - so pay for the full game or just don't.

Next, you'll want to make a directory. A simple back up of the data folder would probably suffice. In the root of your SD card there's an empty directory called "sdmc_save" (or whatever you called your directory)

Put the **game boot.zip** and the **GameDevSim.tgz**(you'll get what you pay for) in this directory

Code:

Mov e to the sdmc_save directory, right click it and Click New Directory

Code:

Now rename the directory to save_data_backup. (easy to remember)

Code:

Now click the game boot.zip file, right click it and click unzip so that you have a broken up file called **game boot.zip.sdf**

Code:

Paste this broken file in your **sdmc_save** directory.

Code:
